EXPERIENCE

Data Science Intern

July 2024 – January 2025

Mente consultancies

Delhi

- Designed Python-based systems for **rolling feature updates**, signature storage, and **real-time predictions** without database dependency.
- Built Calendar and Rebase Marts in SAS to restructure time-series data, address seasonality, and ensure data quality.
- Developed **statistical variables** and **pipelines** in SAS Viya for machine learning models, enabling robust predictions.
- Created **SAS Visual Analytics dashboards** to monitor model performance and data drifts.

SWE Intern

May 2023 – August 2023

Cognus Technology

Udaipur, Rajasthan

- Contributed to live project **Gradding** using **Flutter**, **Dart**, and Figma.
- Designed intuitive on-boarding with **questionnaires** and document uploads, **handling return** cases seamlessly.
- Conducted in-depth market research on competing applications, analyzing **features** and identifying **gaps** to streamline on-boarding app development by **25%**.

TECHNICAL SKILLS

Tools/Platform : Vim, Git, Linux, MLFlow, EC2, S3, Docker, Sed/awk, Jenkins

Languages : Python, C/C++, Shell, Dart

Frameworks : TensorFlow, Django, OpenCV, PyTorch

Databases : MySQL, SQL, Firestore

EDUCATION

Sir Padampat Singhanian University

Bachelor of Technology in Computer Science(AI-ML) GPA: 7.538

Udaipur, Rajasthan

October 2020 – May 2024

PUBLICATION

ECG-Lense: Benchmarking ML & DL Models on PTB-XL Dataset

[Paper Link](#)

- Published research in IEEE on ECG classification advancements using deep learning.
- Designed CNN model architecture with accuracy of **80%** for classifying raw 12 lead ECG Statements.
- Solved class unbalancing with **SWT(Stationary Wavelet Transformation)** for augmentation the minor ECG classes
- Used **PTB-XL**(v0.3) ECG dataset, consist of **21K+** records taken from **18K+** patients for 10 seconds.

PROJECTS

A MLOps Project - Wine Quality Prediction

Python, MLflow, Scikit-learn, YAML, CI/CD

- Built an end-to-end MLOps pipeline for wine quality prediction, covering **data ingestion, validation, transformation, model training, evaluation, and prediction**.
- Automated workflows using **YAML** configurations for seamless pipeline updates and scalability.
- Used **MLflow** for model tracking, registry, and deployment, ensuring reproducibility and monitoring.
- Developed a user-friendly interface with **Flask** for real-time predictions and integrated CI/CD practices.

More Projects

ACHIEVEMENTS

Silver Medalist - Coding Hackathon, 2023. [Certificate](#)

Silver Medalist - All India IEEE Ideathon, 2021. [News](#)

Gold Medalist - All India IEEE SPSU Ideathon, 2020. [News](#)

Automate the Boring Stuff with Python Programming by Al Sweigart - on Udemy. [Certificate](#)

Docker Essentials - By IBM. [Certificate](#)

Data Science Training - on Internshala. [Certificate](#)

ACTIVITIES

Google Cloud Skill Boost: Career Readiness - Associate Cloud Engineer Path. [Certificate](#) [Credly](#)

Exploring Federated Learning as part of my International Research Internship. [Certificate](#)

Writing research paper on my Bloom Taxonomy Level Classification Project
