MACHINE LEARNING

Highly motivated Machine learning Fresher, proficient in **Python**, and eager to learn cutting-edge technology. Skilled in **data preparation, statistical analysis**, and **version control** (Git). Seeking internship to contribute to real-world projects and gain experience under expert guidance.

TECHNICAL SKILLS

Languages : Python, C/C++, Java, Shell, Dart
Frameworks : Tensorflow, Apache Spark, PyTorch, Scikit-learn
Databases : MySQL, SQL, Firestore
Tools/Platform : Linux, Git, MLFlow, Docker
Miscellaneous : Supervised/Unsupervised Learning, Natural Language Processing

EXPERIENCE

SWE Intern June 2023 – August 2023
Cognus Technology Udaipur, Rajasthan

- Contributed to live project **Gradding** using **Flutter, Dart**, and Figma.
- Designed intuitive onboarding with **questionnaires** and document uploads, **handling return** cases seamlessly.
- Conducted in-depth market research on competing applications, analyzing **features** and identifying **gaps** to streamline onboarding app development by **25%**.

EDUCATION

Sir Padampat Singhania University Udaipur, Rajasthan
Bachelor of Technology in Computer Science(Artificial Intelligence - Machine Learning) October 2020 – May 2024

PROJECTS

Blooms Taxonomy Level Classification Python, MLFlow, MLOps Techniques

- Developed a MLOps project using **Flask, SMOTE, TF-IDF Vectorizer, Pipeline**
- Effortless classifies question in blooms taxonomy level with **90%** accuracy, thanks to **NLP-Aug**
- Created **Docker** image and pushed to Docker Hub
- Added prediction API for utilization purpose for HEI's following **OBE**

ECG statement Classification - Major Project Python, Wfdb, SWT

- Developed ECG Signal Classification System using ML/DL for 5 Conditions: Normal Heart, Heart Attack, Conduction Issues, Enlarged Heart, Irregular Electrical Activity.
- Comparative Analysis of ML Algorithms (Logistic Regression, Decision Trees, SVM) DL Models (CNN, LSTM, Large CNN) on Large 21K+ ECG Dataset.
- Optimized Model Accuracy Interpret-ability for Reliable Heart Disease Detection from ECG Data.

More Projects

ACHIEVEMENTS

Silver Medalist - Coding Hackathon, 2023. [Certificate](#)
Silver Medalist - All India IEEE Ideathon, 2021. [News](#)
Gold Medalist - All India IEEE SPSU Ideathon, 2020. [News](#)
Automate the Boring Stuff with Python Programming by Al Sweigart - on Udemy. [Certificate](#)
Docker Essentials - By IBM. [Certificate](#)
Data Science Training - on Internshala. [Certificate](#)

ACTIVITIES

Writing research paper on my Bloom Taxonomy Level Classification Project
Exploring Federated Learning as part of my International Research Internship. [Certificate](#)
Created Gemini-ATS: A smart Application Tracker System for analyzing resumes with job description
